# REQUIREMENTS ANALYSIS

## Steps of Requirements Analysis

# The requirements analysis process

# REQUIREMENTS ANALYSIS

## Requirements Analysis and Specification

# Steps Involved in Requirement Analysis

Understand the Problem

Define the Requirements

Validate the Requirements

Analyze the Requirements

Document the Requirements

Implement the Requirements

# Software Requirement Analysis

- Determining the needs or conditions to meet for a new or altered product,
- In other words, process of studying and analyzing the customer and the user/stakaholder needs to arrive at a definition of software reqiurements.
- Requirements must be actionable, measurable, testable, related to identified business needs or opportunities, and defined to a level of detail sufficient for system design.
- Requirements can be functional and non-functional.

# AGILE REQUIREMENTS GATHERING

# REQUIREMENTS GATHERING PROCESS

## 01-Participants Line Managers

- Better Management of Projects.
- Confidence in Project Management Capability .

## 02-Project Sponsors

- Projects Easier to Start-up & Establish
- Better Project Delivery.

## 03-Top Management

- Better Management of Projects
- Satisfy "Modernizing Government".
- "House Style" For Projects Management

## 04-Likely Participants

- Project Management Skills.
- Personal & Career Development.
- Interesting ,Practical , Relevant Training.

## 05-IT Unit

- Fits With Prince

## 06-H.R Unite

- Good Training.
- Coherence With Other Training.
- Contributes to "Leading Edges" Portfolio.
